 Our new 'Aliens' are a little gimmick for your model landscape. They're a perfect fit with the UFO Crash (ref. 60765) new item presented in 2023 but can also be combined with other NOCH Figures Sets such as the Special Task Force (SEK) previously shown.
Expected release: March 2024

HO 15812 Aliens NEW

H0 Themed Figures Sets

The Themed Figures Sets have been an integral element of the NOCH range for years. Thanks to the lovingly designed figures with lots of matching accessories, decorating your model landscape will go perfectly.

Expected release: October 2024

Themed Figures Set 'Buffet'

Mmm, that smells good! Who doesn't love beautifully presented, tasty buffets? A buffet is always an unmistakable sign that something special is going on. And there are lots of occasions for opulent buffets: whether it's a holiday, anniversary celebration, work do, milestone birthday or ceremonial reopening, a buffet is part of it!

Our three lovingly designed scenes cover the entire spectrum of delicacies on a buffet, from starters to main courses and desserts. Naturally, the appropriate figures are included, from chefs to waiters and feasting patrons. Tuck in!

Tip: Take a look
at the Themed Figures
on our website at www.noch.com.
There you'll find many additional
ideas for decorating individual scenes.

Themed Figures Set 'Flea Market'

There's something here to suit every taste, from antique furniture to vintage clothes and used toys. The variety of products on offer makes flea markets a paradise for bargain hunters and collectors. The people who visit flea markets are as diverse as the products. Young people seeking unique fashion statements, older people looking for memorabilia from bygone days, or families wanting to complete their household – everyone is full of enthusiasm for it.

Our three lovingly handpainted scenes depict this hustle and bustle in a model. Sellers offer for sale antiques, second-hand textiles and used toys, while customers and passersby look on excitedly.

H0 16280 Themed Figures Set 'Flea Market'
Contents: 4 customers, 1 seller, 1 table with antiques, 1 blanket with antiques

NEW

H0 16281 Themed Figures Set 'Flea Market'
Contents: 4 customers, 1 sitting seller, 1 large table with textiles and shoes, 3 small tables with textiles and shoes

NEW

NEW

Post-Haste!

Themed Figures Set 'Post Netherlands'

It's not just since the online shopping excesses during the corona pandemic that we have realised how important the boys and girls from the postal service are to us. They deliver letters and parcels safely to their recipients in all kinds of weather. Could there even be a NOCH product inside?

H0 16264 Themed Figures Set 'Post Netherlands', Contents: 1 postman, 3 parcel couriers, 1 postman on a bicycle, 1 postal trolley, 2 postman trolleys, 1 bicycle, 1 cargo bike, 1 platform trolley, 2 different postboxes
Expected release: March 2024

NEW

H0 16265 Themed Figures Set 'Post', Contents: 1 postman, 3 parcel couriers, 1 postman on a bicycle, 1 postal trolley, 2 postman trolleys, 1 bicycle, 1 cargo bike, 1 platform trolley, 2 different postboxes

NEW

Our new Figures Advent Calendar will be released in September 2024!

A little joy every day!

No Time for Hobbies? We've Got the Solution!

**Decorative Advent Calendar
'Right & Left Along the Tracks'**

The 'peaceful' lead-up to Christmas is usually quite challenging: far too much work and far too little time for the nice things in life? We know all about that! So that your favourite hobby doesn't fall short of expectations at Advent, and you get to experience a bit of joy crafting, we've devised the NOCH Decorative Advent Calendar for you.

You can use the contents to add a little something to your model railway layout every day during Advent. They have been chosen so that the little accessories and figures are suitable for every layout. And once the 24 doors have been opened, the really meaningful part of the holiday season can begin, with plenty of time for the nicest hobby in the world.
Expected release: September 2024

Individual Figures in 3D Colour Printing

3D Master Figures for HO Gauge

 It's a great innovation: these lovingly designed HO figures are printed in full colour. Unprecedented design possibilities such as colour gradients and colour patterns (stripes, checks, etc.) arise from this fantastic new technology. Take a close look at the 3D Master Figures and discover their fascinating colourful details.

3D Colour Printing – The Innovation

3D Master Figures for N and Z Gauge

We first introduced colour-printed figures for N and Z gauge in 2023. Striped shirts, dresses with colourful prints and super-realistic uniforms can be realised in model form thanks to this innovative technology. We were very pleased that our 3D Master Figures were so well received by you and are continuing to expand our range.

A Highlight for N-Gauge Modellers: Themed Worlds in 3D Colour Printing

Themed Figures Sets for N Gauge

3D 3D colour-printed model railway figures offer unprecedented attention to detail and realism. We presented eight of these highly innovative models in 2023. We will show you ten new, high-quality models on page 12 of this brochure. The new, colour-printed themed worlds for N gauge go the extra mile: these delicate and extremely realistically designed figures come with matching accessories, which are colour-printed, naturally. This is how great scenes can be realised in N gauge.

Expected release: October 2024

Germany's Most Popular Hedge

Thuja Hedge for H0, TT and N Gauge

Almost everyone is familiar with evergreen thuja trees and shrubs. As a hedge, the thuja, also called the tree of life, lines countless gardens and parks. As a solitary plant, the thuja is imposing, as it can grow to well over 20 metres high.

Expected release: April 2024

H0 TT N 21547 Thuja Hedge, 12 pieces
Height: 3 cm

Variety for Your Model Garden

Ornamental Bushes for H0, TT and N Gauge

Large and small bushes and shrubs can be found everywhere. Gardens, parks, terraces and even balconies are decorated with and shaded by shrubs. The Ornamental Bushes bring variety and diversity to your model landscape.

Expected release: April 2024

H0 TT N 21546 Ornamental Bushes, 12 pieces
Height: 4 cm – 5 cm

NEW

Off to the South!

Palm Trees for H0, TT and N Gauge

The impressive 'Palm Trees' are true modelling works of art: the filigree palm leaves are laser-cut, and the trunks are 3D printed. The very high-quality, handcrafted trees are suitable for decorating gardens, terraces, squares, parks, cafés and open-air restaurants – and for realistically designing wonderful sand beaches, too, of course. In addition, the Palm Trees perfectly complement the micro-motion Scene 'Palm Trees with Hammock'.

Expected release: April 2024

H0 TT N 21973 Palm Trees, 4 pieces
Height: 4.5 cm

NEW

Handmade for the Highest Quality Standards!

Master Trees

We are setting a new quality standard with the Master Trees series. Each wire tree blank is assembled by hand from up to 40 individual wires. The thick trunk is twisted from all of the wires; thick branches are created from a bundle of wires; thin branches and the finest ramifications from just a few wires.

A major advantage of these wire tree blanks is that they can easily be brought into shape later by bending them.

The tree skeleton is naturally coloured and flocked with different materials depending on the species of tree. Of course, we make sure that, just like in nature, only slender branches bear foliage, while the stronger branches and trunk are not flocked.

The result is a super realistic tree. Due to the very elaborate manual work involved, every Master Tree is unique, which gives your modelling project a customised quality.

Already available at your local dealer.

Note:

Master Trees are not only ideal for railway modellers working with all gauges but also for designing bases, dioramas and landscapes. The sizes are interesting for 1:35, 1:48 and 1:72 military modelling scales, for example. Car modellers for scales 1:24, 1:32 and 1:45 are also sure to find the suitable tree.

To learn whether the relevant tree is suitable for your purposes, you can consult the table on the packaging or the product page on the website at www.noch.com.

Info Tip:

Master Trees are made of twisted white wire. You can therefore also change the shape of the finished tree afterwards.

We've Seen the Light!

micro-rooms

Interior lighting for buildings has been around for a long time and is certainly nothing special. But the new NOCH micro-rooms are! In a development process that lasted almost a year, we combined our modellers' best ideas to give you great new options for designing the lighting in your model buildings.

Until now, individual light bases or neutral light boxes for individual windows were common. The NOCH micro-room System, on the other hand, is based on cardboard light rooms of different sizes, which can be decorated with the enclosed decorative sheets. Equipped with a floor, wallpaper, etc., they're ideal for decorating with NOCH furniture and figures. The LEDs are affixed at the top of the light room. Assisted by the enclosed diffuser film, light from the LED is realistically distributed throughout the room. If you want, hang up a pair of curtains and you'll have another highlight in your model world! Design lovely details with NOCH products, from everyday scenes at the kitchen table to a passionate night of lovemaking in the bedroom!

The LEDs are available in cool or warm white and in single or double versions. They can be connected to a 16 V model railway transformer and are suitable for AC and DC. Thanks to the technology built into the mini circuit board, you can connect it directly without additional series resistors. Guaranteed to be free of flickering!

The LED circuit boards measure 0.7 cm x 1.8 cm and are thus suitable for home lighting systems and light boxes by other manufacturers such as Viessmann®.

Expected release: April 2024

Product Highlights:

- single and double LEDs
- cool white and warm white LEDs
- particularly good value
- flicker-free & long-lasting
- no additional series resistor necessary
- can be connected directly to 16 V transformer
- suitable for AC and DC
- fit other manufacturers' lighting systems, e.g. Viessmann®

Video-Clip

HO 51250 micro-rooms LED Building Lighting Kit Starter Set with 4 LEDs + 8 Interiors

Contents: 4 LED lights for building interior*:
 1 x single LED, cool white; 1 x single LED, warm white
 1 x double LED, cool white; 1 x double LED, warm white
 1 diffuser film, 5 cm x 5 cm sheet
 7 decorative sheets with doors, wallpaper, curtains and lots of decorative elements
 8 micro-rooms building interiors*:
 2 x type A: 3.5 cm x 1.5 cm, 2.8 cm deep
 2 x type B: 3.5 cm x 3.0 cm, 2.8 cm deep
 2 x type C: 4.6 – 8.7 cm x 1.5 cm, 2.8 cm deep
 2 x type D: 4.6 – 8.7 cm x 3.0 cm, 2.8 cm deep
 1 set of detailed instructions

*One of each LED type is included in the set to try out. Up to 4 light rooms can be equipped with these. You can also obtain other LEDs sorted by type for your individual needs from NOCH.

Craft Tip:
micro-rooms

The cardboard micro-rooms are folded and glued together to form a light box. NOCH Laser-Cut Adhesive (ref. 61104) is ideal for this.

Floors, wallpaper and decorations are cut out and glued into the room. Then place NOCH figures and furniture in the lighted room.

The desired LED is affixed. Depending on your needs, cool or warm white and single or double versions are available.

The finished micro-rooms is glued behind the window in the wall of the building. The LED can be connected directly to a 16 V transformer without an additional series resistor.

Endlessly Flexible & Creative!

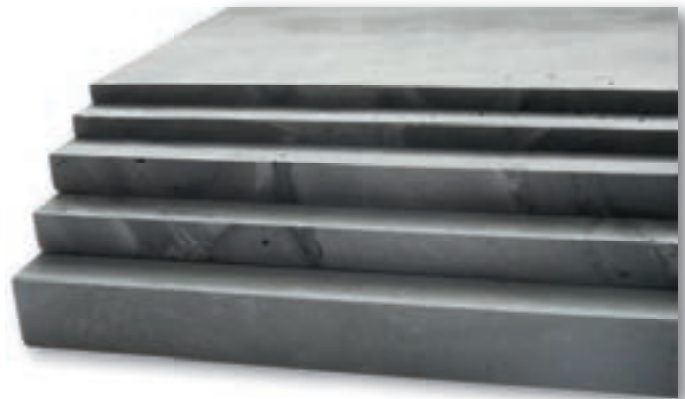

Hard Foam DIY Slabs

With these nice NOCH Hard Foam DIY Slabs, you can design walls, copings, barriers, roads, squares and much more. The DIY Slabs are made of NOCH Hard Foam and are easy to work with. They can be shaped quickly with a saw or a craft knife. Textures such as wall cracks or joints can be etched in with knives, files and cutting tools.

Hot glue is suitable for glueing. To refine the surface, it can be filled with NOCH Modelling Compound (ref. 60920) and dusted with NOCH Structured Powder (ref. 60822).

It is possible to paint over the slabs with NOCH Acrylic Paints and Acrylic Sprays without any problems. The DIY Slabs can be perfectly combined with various products from the NOCH Hard Foam Walls series.

Expected release: May 2024

58301 Hard Foam DIY Slabs, 5 pieces

NEW

Contents:

1 Slab 35 cm × 18 cm, 2 cm strong

2 Slabs 35 cm × 18 cm, 1.2 cm strong

2 Slabs 35 cm × 18 cm, 0.6 cm strong

Craft Tip:
NOCH DIY Slabs

The DIY Slabs are simply cut into shape with a craft knife.

Hot glue is suitable for glueing.

Cracks, joints and textures can be etched in the material with knives and cutting tools.

The NOCH Acrylic Paints can be used to create an individual colour tone.

New Material – New Possibilities!

Structured Powder

We always strive to make good things even better and have therefore further improved our Structured Powder for you.

NOCH Structured Powder is extremely fine to enable you to add texture to roads, squares, walls and other components. Using a shaker, the powder is sprinkled evenly over the surface coated with NOCH Grass Glue (ref. 61130). When the Grass Glue is dry, the surface is painted over with e.g. NOCH Structured Road Construction Paint (e.g. ref. 60825) or NOCH Acrylic Color (e.g. ref. 61196) and the area is sealed with it.

Our tried and tested Road Construction Set will also be delivered with the new material in future (new ref. 60821).

Expected release: May 2024

60821 Starter Set Road Construction NEW
 Contents:
 Tub, 250 g Structured Powder
 Bottle with 125 ml Grey Acrylic Road Paint

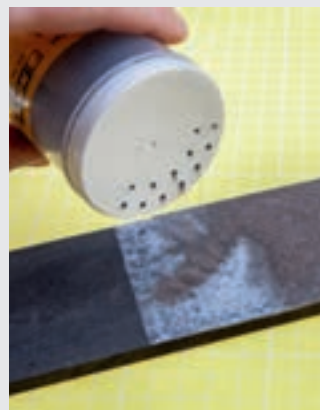

60822 Structured Powder NEW
 Contents: 500 g

Craft Tip:
NOCH Structured Powder

The surface is coated with NOCH Grass Glue (ref. 61130).

The Structured Powder is sprinkled over the glue. This is very easy to do with roads and squares ...

... but also with walls, ledges, etc. using the NOCH PROFI Shaker (ref. 08099).

Once the glue has dried, NOCH Structured Road Construction Paint (e.g. ref. 60825) is applied.

A True Architectural Icon

The Famous 'Milchpilz' as a Model

 The Milchpilz (lit. milk mushroom, a kiosk selling milk in the shape of a fly agaric mushroom) was conceived in the 1950s as an original kiosk by Wangen businessman Anton Waldner and built by his company, Waldner. Around 50 of these white spotted mascots were sold all over the world, with some of them still in use today; for instance, in Wangen, Lindau and Regensburg in Germany and Bregenz in Austria.

The Milk Mushroom is making a great comeback at the State Garden Show in Wangen im Allgäu: the architectural icon can be admired in several places within the garden show grounds.

The little 'Milk Mushroom' is a true-to-scale finished model for H0 gauge that was produced using injection moulding techniques. In the large NOCH range, you'll find lots of matching figures and accessories for designing a beautiful model scene.

Expected release: March 2024

Two Knights, One Princess: An Old Story That Still Fascinates!

micro-motion Knights' Tournament H0

The red knight has asked for the princess' hand in marriage, but the blue knight is completely opposed. And just as knights

did in the time before gender equality, he challenges him to a duel! What is the king to do? He forlornly watches the jousting, keeping his fingers crossed for his favourite.

Powered by the micro-motion drive, the two knights on horseback move realistically towards each other in the tournament arena in each round so as to then position themselves again for the next round.

The Tournament Arena, the Gate with Box and the Stand are designed as a laser-cut kit. The electronics for the movement are ready for installation and can be connected to a standard 16 V model railway transformer. Suitable for AC and DC. Nine highly detailed, colour-printed figures are included for decoration.

The model is limited to 1000 copies. A numbered certificate, detailed instructions and special Laser-Cut Adhesive are included.

Expected release: November 2024

Note: on the following pages, you'll find the Themed Set 'Mediaeval Market', the Stand and other Laser-Cut minis you can use to design a contemporary mediaeval market around the tournament. After all, jousts are still real crowd pullers today and can be realistically integrated into your model landscape.

H0 66828 *micro-motion Knights' Tournament* **NEW**

Contents:

- Laser-Cut Kit 'Tournament Arena', Gate with Box, Grandstand, 2 tents
- 9 exclusive, colour-printed figures, two of them on horseback for use in the tournament arena
- micro-motion drive
- Numbered certificate
- Detailed instructions
- Special Laser-Cut Adhesive

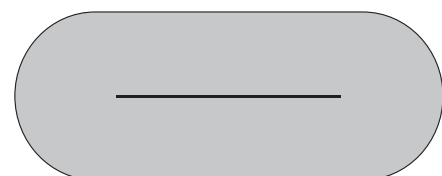

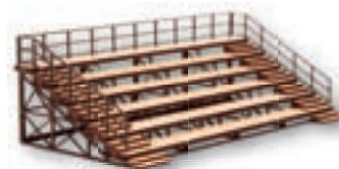

Video-Clip

Gate with Box: 21 cm x 41 cm, 11.5 cm high

Stand: 13.4 cm x 6.9 cm, 4.4 cm high

Tournament Area: 38 cm x 15 cm, 4 cm high
Installation Depth: 4 cm

Come Closer, Come Over Here!

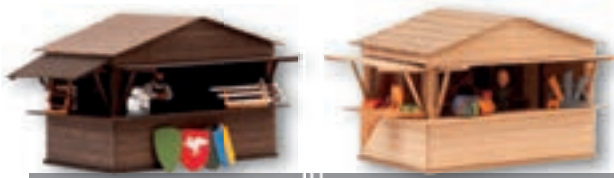

Themed Set 'Mediaeval Market' H0

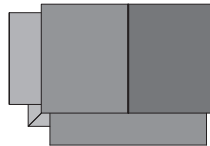

With the Themed Set 'Mediaeval Market', you can create another attraction fitting with the jousts

for young and old. Traders offer customers goods at their stalls. The stalls are designed as laser-cut kits and can be assembled with the special Laser-Cut Adhesive supplied. Two handpainted figures and accessories are included for decoration.

Expected release: November 2024

- H0 65618 Themed Set 'Mediaeval Market'** NEW
- Contents
- 2 Laser-Cut Kits 'Sales Stall'
 - 2 Figures 'Salesman'
 - 7 Accessories 'Iron and Leather Goods'
 - Special Laser-Cut Adhesive

6 cm x 4.1 cm, 3.5 cm high

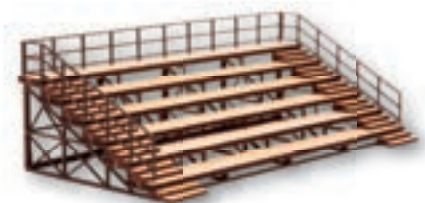

There's Plenty to See Here!

Stand H0

The little 'Stand' is an ideal addition to the Knights' Tournament (ref. 66828) and many other events. Bicycle races, football matches and other sporting events can be watched comfortably from the stands with the appropriate NOCH Figures. The suitable Laser-Cut Adhesive is included in the kit.

Expected release: November 2024

Over 100 Years of 'Contemporary Building and Living'

Bauhaus Show Home 'Haus am Horn' H0

The 'Haus am Horn' was planned in 1923 on the occasion of the first Bauhaus Exhibition in Weimar and was built in just a few months. The design by Bauhaus master Georg Muche was revolutionary. The latest building materials and findings from research and teaching at the Weimar school were consistently used in construction. It is the first and only piece of architecture that the Bauhaus school realised in Weimar.

With the 'Haus am Horn', various Bauhaus workshops illustrated how they imagined contemporary living. All rooms are positioned around the inner central living space, which is provided with daylight via a skylight. One special feature of the floor plan is the clear allocation of the rooms according to their actual functions. Instead of a large kitchen-cum-living-room, for example, the kitchen was only intended to be used for preparing food whereas the dining room was only for eating. The house had several smaller but clearly structured rooms that were complemented by the latest technology, such as central heating in the basement and gas-powered water heaters in the bathroom and kitchen. Modern household appliances such as a gas cooker, vacuum cleaner and coffee machine aimed to lighten a housewife's workload to give her more time for intellectual activities. The lack of additional rooms for domestic staff is therefore also consistent: a family of three or four had to look after itself. The 'Haus am Horn' show home thus reflects the concept of a changed social reality. It is therefore unsurprising that the building caused controversy amongst the press and critics when the exhibition opened.

The architectural office of Walter Gropius, founder and first director of Bauhaus, took over the work to be performed. Marcel Breuer, a student of Bauhaus in Weimar who was then largely unknown, designed his first pieces of furniture for the interior spaces, including a dressing table for the lady of the house – his journeyman's piece.

Beyond the turmoil of the 1930s and 1940s, the 'Haus am Horn' continues to polarise people to this day. For proponents of Bauhaus and its design principles, its simplicity and functionality make it an elegant and timeless building that foresaw social developments and pointed out architectural solutions over 100 years ago: a true icon of architecture that was declared a UNESCO World Heritage Site in 1996.

The NOCH Laser-Cut Kit has been realised in the exact architectural scale of 1:100 and is therefore ideal for use in H0 gauge. The kit is precisely laser-cut from card. No unnecessary plastic is used in the packaging. Instructions and the appropriate special Laser-Cut Adhesive are included.
Expected release: June 2024

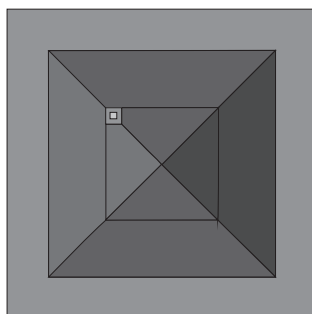

NOCH ... Just like the original! The prototype for the laser-cut kit is located in Weimar.

Around the World – In the Middle of Switzerland!

World Heritage Site of the Albula Railway H0 and N

The Albula Railway, which connects Thusis with St Moritz in Switzerland, is internationally known and loved far beyond Switzerland's borders. The route, which is 60 kilometres long, leads over 144 bridges and through 42 tunnels and galleries. The divine mountain panorama goes a step further to make the narrow-gauge route one of the most spectacular in the world. The route was declared a UNESCO World Heritage Site in 2008.

Bergün station is at the entrance to one of the most exciting parts of the route in the direction of Filisur. Today, the building houses the Albula Railway Museum.

The Laser-Cut Model Kit is lasered from high-grade card and supplemented by 3D printed parts. As well as instructions for assembly, suitable special Laser-Cut Adhesive is included.

Expected release:

ref. 63005: April 2024

ref. 66005: September 2024

In real life, the Bergün two-stall engine shed is located directly at the station of the same name. There is space for two locomotives in the shed. The model gates can be shown open or closed.

The Laser-Cut Model Kit is lasered from high-grade card and supplemented by 3D printed parts. As well as instructions for assembly, suitable special Laser-Cut Adhesive is included.

Expected release: April 2024

Across Rivers and Roads ...

Albula Railway's Brombenz Viaduct

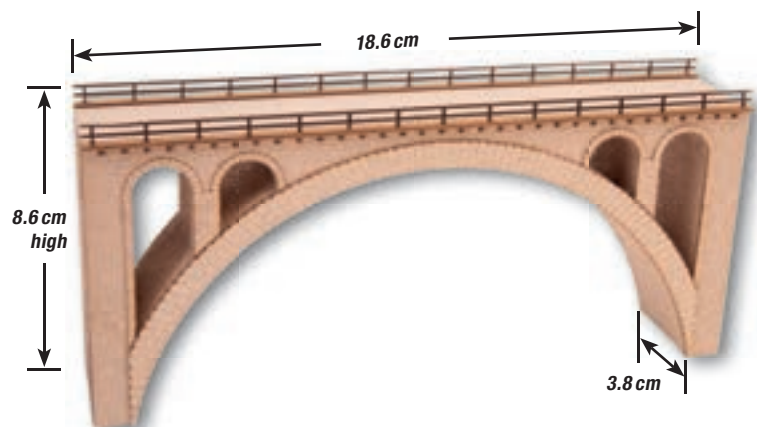

The railway bridge known as the 'Brombenz Viaduct' or the 'Landwasser Viaduct in the trains' is located on the route between Davos Monstein and Davos Wiesen. It is one of the Albula Railway's most striking structures and came into being between 1908 and 1909. With a length of over 40 metres, it spans the Landwasser River and a road at a height of over 20 metres.

The Laser-Cut Kit is made from high-grade card and, in addition to detailed instructions, also contains suitable special Laser-Cut Adhesive.

Expected release: April 2024

Where a Railway Modeller's Dreams Come True!

N NOCH Easy-Track Railway Route Kit 'Albula Railway'

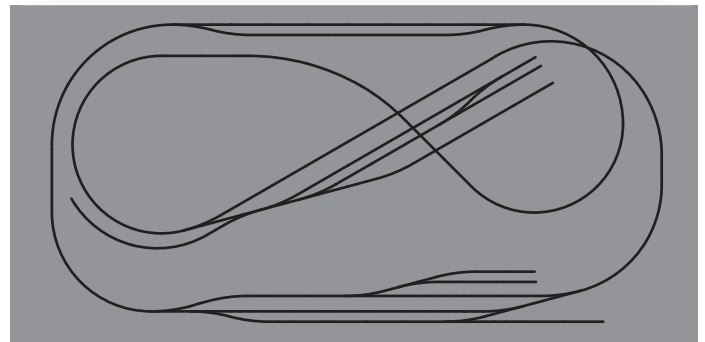

The floorspace of the 'Albula Railway' of at least 200 cm × 100 cm offers N-gauge fans a lot of room to implement a railway circuit with crossing rail traffic in 1:160 scale. The clever track plan offers the option to build a fiddle yard or a double-track bypass. A headshunt is provided in the goods yard. This small detail takes the railway modelling fun to a whole new level, because the locomotive of an incoming train can be hitched from the front to the rear and then pull the wagons out of the goods yard again – just like the original!

The very large station area is modelled on the track diagram of Bergün Station in Switzerland. With the Station 'Bergün' (ref. 63005), Engine Shed 'Bergün' (ref. 63025) and 'Brombenz Viaduct' (ref. 62832) kits that are available separately, particularly defining points of the Albula Railway can be perfectly reproduced in a model.

In the NOCH Guidebook Easy-Track 'Albula Railway' (ref. 71901, in German), we have shown you step by step (in text and pictures) how the layout is built. Each kit comes with a guidebook, but it can also be ordered separately at www.noch.com before starting the building project. **Expected release:** April 2024

Florian Giwanski
NOCH Developer and
Modeller

The catalyst for this project was an old special issue about the Albula Railway from 1988, which examined the railway line between Landquart–Davos–Filisur. I quickly got the impression from the 2024 annual focus theme of ‘Around the World’ that I wanted to replicate that in a model. After some research, the choice ultimately fell on adopting the station area at Bergün prior to its renovation in 2013 as the centrepiece of this track plan in my favourite gauge, N. This is how the Easy-Track Railway Route Kit ‘Albula Railway’ was created. The project is ideally complemented by KATO UNITRACK tracks for N gauge and the RhB series with exciting locomotive and wagon models as well as the new NOCH Laser-Cut Kits.

My layout is built on a floorspace of 225 cm × 125 cm and its Swiss mountain landscape offers a great platform for KATO models. A special highlight is the separation of the floorspace by the backdrop located almost in the middle. As a result, the landscape merges into the vastness of the background and leaves room for countless beautiful, detailed views when you follow the rail traffic around the layout.

MIBA Special: ‘The RhB as a Model’

The NOCH Guidebook Easy-Track ‘Albula Railway’ (ref. 71901) was created in collaboration with the specialist magazine MIBA. An issue with identical content, ‘The RhB as a Model’, will be published in German as MIBA Special No. 146. You can purchase it online at www.miba.de/miba-spezial or from your local dealer. The two publications will be available from April 2024.

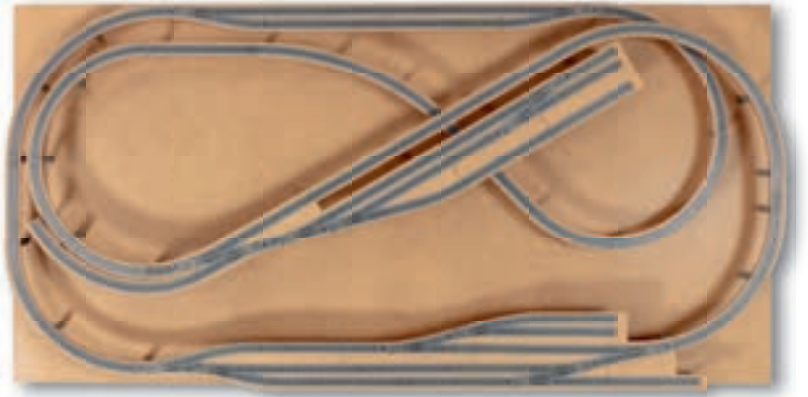

The Name Says It All: Easy-Track Railway Route Kits by NOCH

Easily Design Customised Model Railway Layouts

As with every Easy-Track Kit, the Easy-Track Railway Route Kit 'Albula Railway' takes care of planning the track layout for you. It was particularly important to us to integrate gradients of a maximum of 2.9% into the track plan for this large N-gauge layout. This ensures that even long train sets that can be accommodated on the layout can overcome height differences without any hassle. We recommend using KATO UNITRACK tracks as this system has uniquely large radii to offer. You can also find matching locos and wagons for use on the 'Albula Railway' in the KATO range.

Expected release: April 2024

Outer dimensions of constructed routes:
199 cm x 99 cm

Minimum floorspace required for assembly
200 cm x 100 cm

Contents:

- 1:1 plot track plan
- 1 Guidebook Easy-Track 'Albula Railway for N Gauge', German
- Track plans for KATO UNITRACK, Minitrix®, Fleischmann with ballast bed (piccolo) and Fleischmann without ballast bed
- 62 pillars; maximum pillar height 12.7 cm, minimum pillar height 0.6 cm
- 15 circle segments, 45°, 4 cm wide
- 5 circle segments, 30°, 4 cm wide
- 4 circle segments, 15°, 4 cm wide
- 7 straight lane segments, 4 cm wide
- 14 railway station modules
- wood screws

Azariah Mertens,
NOCH Developer and
Modeller

On a floorspace of 210 cm x 115 cm, I have chosen classic model railway subjects and further emphasised them by consciously placing opposites in close proximity to each other. A huge mountain massif is built upon the double-track fiddle yard. Due to the combination, with a valley lowered to the bottommost level, through which a bridge crosses and at the bottom of which a hotel building stands, the rock faces appear even higher and mightier. In contrast, with the route and station area in front of it, the central track layout is imposing but not obtrusive. This consciously used 'gigantism' makes buildings, trains, figures and trees appear even more delicate, especially in the small N gauge. I paid

particular attention to giving the landscape a realistic design, e.g. by spraying the fir trees with black acrylic spray. Light and dark grass fibres were optically combined in the green areas to create realistic meadows and pastures. In this way, while observing and daydreaming, model and reality become blurred, and you catch yourself thinking about standing on a high mountain peak and looking at real little villages, trains and people in the valley, instead of in front of your own model railway layout in 1:160 scale in your hobby room.

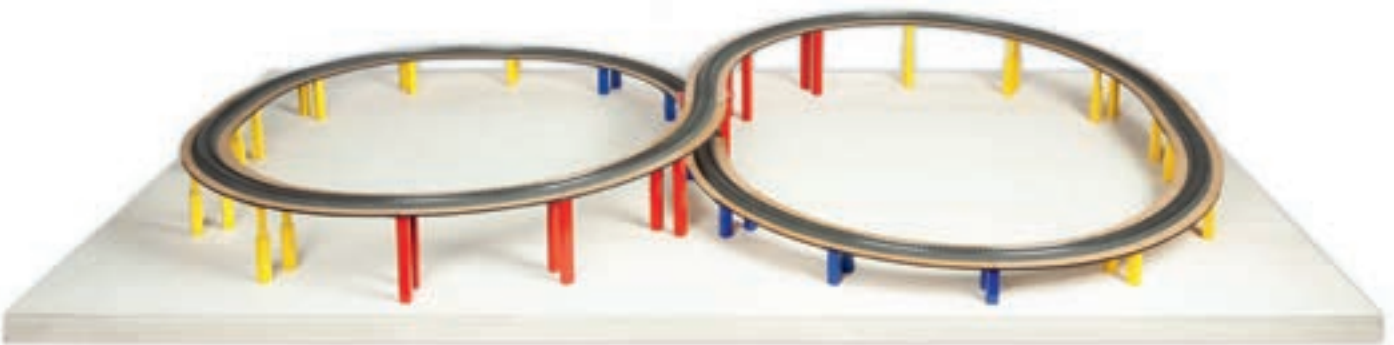

Build Your Custom Model Railway Layout!

Easy-Track Individual

Often requested and now finally here: Easy-Track Individual

No matter whether you're developing your own layout plan or extending a well-known Easy-Track Railway Route kit, this system offers everything you'll need. Based on the Märklin®/Trix® C-Track, you'll find all the components you need to realise your model railway layout. And above all, it's quick and seamless, because the routes are precisely lasered and ready for immediate installation.

Due to our extensive pillar system, you are now lord of the inclines: whether it's a shallow incline for long trains or a steep incline for mountain railways, everything is possible with Easy-Track Individual. You can either fall back on the predefined sets or choose completely freely. Exactly what we said. It's highly 'individual'.

The Pillar Sets 'Bottom', 'Incline' and 'Top' have been colored blue, yellow and red in the illustration for better understanding.

The Pillars – Total Flexibility

When defining the individual pillar parts, we reverted to the heights we already knew from the railway route kits. Easy-Track Individual is therefore familiar territory for Easy-Track experts. What's new is the height-adjustable Pillars (ref. 53943), which you can use to adjust the height of the routes from 80 mm to 138 mm to suit your individual needs. These pillars guarantee total flexibility for your custom building project.

If the Viaduct Connector (ref. 53910) cannot be used for structural reasons or because of the gradient, the new Connecting Element (ref. 53911) will help you to connect individual routes to one another in a stable manner.

Easy-Track Individual elements not only leave a lot of scope for designing a fascinating route, but above all, the sky's the limit when it comes to your imagination.

With our predefined Pillar Sets, we make it easy for you to start using the system. You can choose between 'Pillar Set, Bottom' (ref. 53940), 'Pillar Set, Incline' (ref. 53941) and 'Pillar Set, Top' (ref. 53942). This inherently consistent system not only offers the ideal clearance height of 8.7 cm but can also be conveniently connected using the incline set. You determine the incline yourself by selecting the distance between individual supports.

 Contents: 10 pieces, Including mounting screws
 Part number: 04272, 04273
 Dimensions: 80 mm – 138 mm

The Routes – Perfect Geometry

Easy-Track Individual offers you the right routes for all important tracks and points, perfectly tailored to the Märklin®/Trix® C-Track®. The width of the routes, which is specially adapted to the track geometry of the C-Track®, is 77.5 mm for single-track routes; the double-track routes are 155 mm.

The railway track sets 53800 to 53844 each contain six routes.

53800 Easy-Track Route, straight, 64 mm

Contents: 6 pieces
Suitable for Märklin C-Track 24064

53880 Easy-Track Turnout Set 611_612

Contents: 2 sets
Suitable for Märklin C-Track 24611/24612
Branch: 1 × 24130, 1 × 24206

NEW

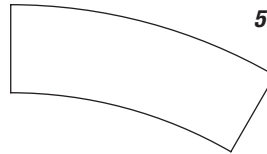

The turnout sets each contain the routes for two switch combinations. The 'Turnout Set' (ref. 53880) is the solution for routing a branch line with straight points. With the 'Curved Turnout Set' (ref. 53881), a branch line can even be created in tight spaces.

53840 Easy-Track Route, curved, R1

Contents: 6 pieces
Suitable for Märklin C-Track 24130
Dimensions of inner radius: 321.25 mm
Dimensions of outer radius: 98.75 × 4 mm

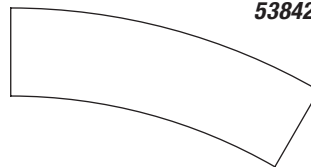

NEW

53841 Easy-Track Route, curved, R2

Contents: 6 pieces
Suitable for Märklin C-Track 24230
Dimensions of inner radius: 398.75 mm
Dimensions of outer radius: 476.25 × 4 mm

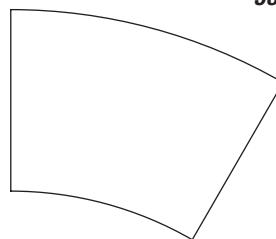

NEW

53842 Easy-Track Route, curved, R3

Contents: 6 pieces
Suitable for Märklin C-Track 24330
Dimensions of inner radius: 476.25 mm
Dimensions of outer radius: 553.75 × 4 mm

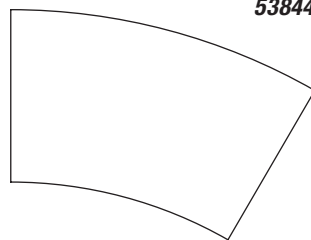

NEW

53843 Easy-Track Route, curved, R1_R2

Contents: 6 pieces
Suitable for Märklin C-Track 24130/24230
Dimensions of inner radius: 321.25 mm
Dimensions of outer radius: 476.25 × 4 mm

NEW

53844 Easy-Track Route, curved, R2_R3

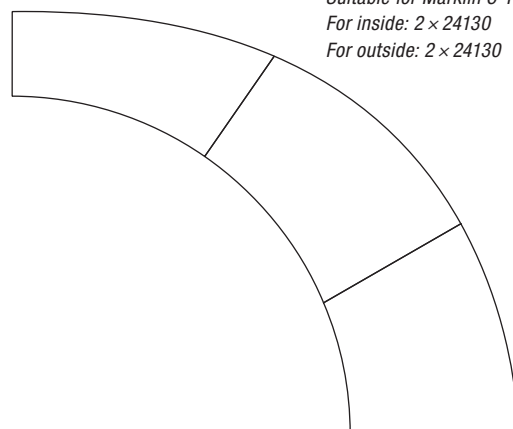

Contents: 6 pieces
Suitable for Märklin C-Track 24230/24330
Dimensions of inner radius: 398.75 mm
Dimensions of outer radius: 553.75 × 4 mm

NEW

53881 Easy-Track Curved Turnout Set 671_672

Contents: 2 sets
Suitable for Märklin C-Track 24671/24672
For inside: 2 × 24130
For outside: 2 × 24130

NEW

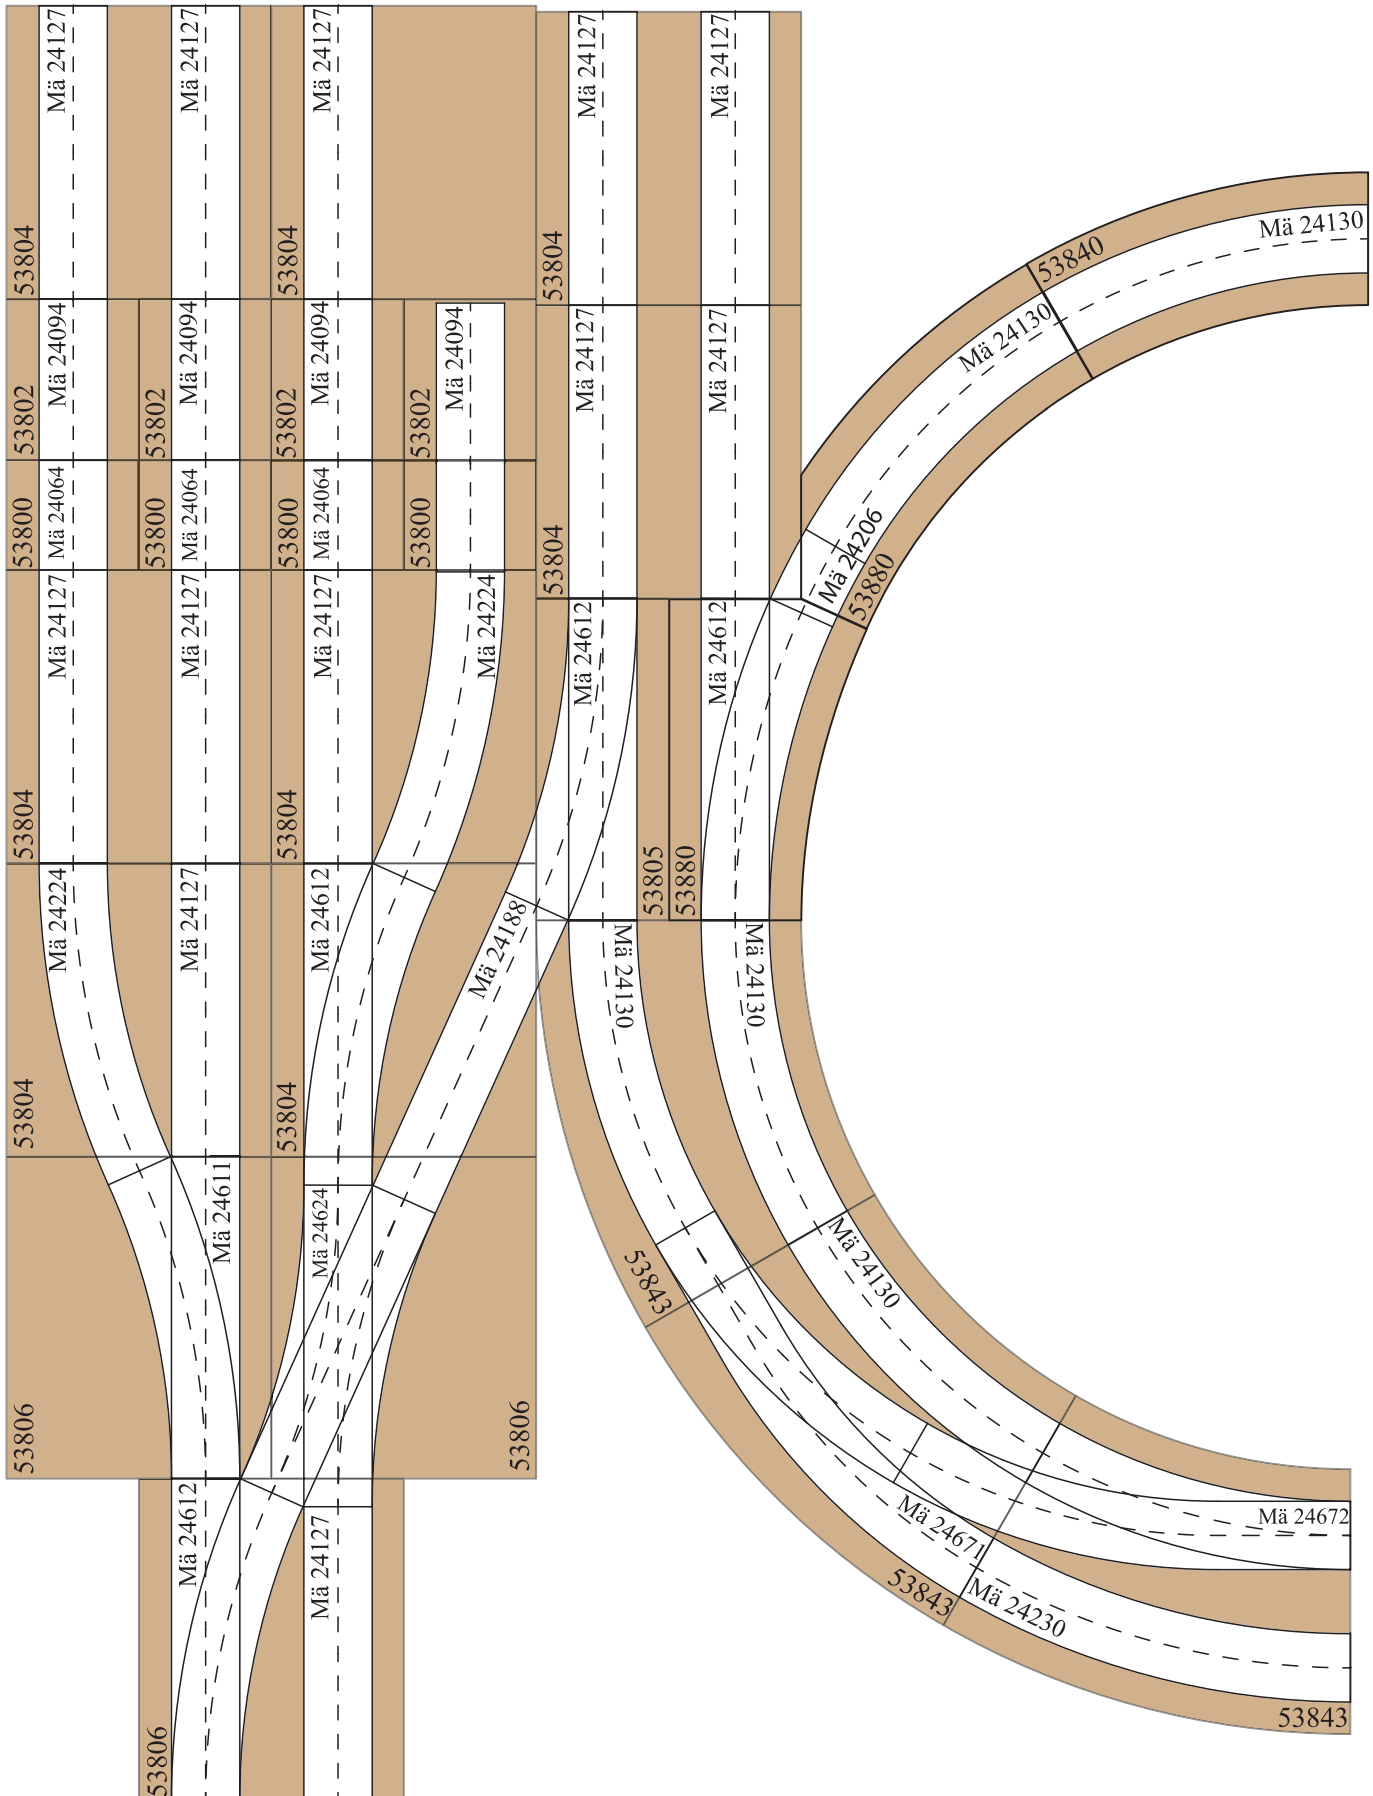

Application Example: Switch Road

What will immediately become apparent is that even complex station entrances and exits are possible with Easy-Track Individual.

The Double-Track Routes 53804 and 53806 are ideal for complex turnout configurations and parallel tracks. If the branch line is not intended to run parallel, Turnout Set 53880 is used, as shown in the illustration.

For C-track curved switches, in addition to the appropriate Curved Turnout Set (ref. 53881), there is also the option of using the 53843 routes. Changing tracks can thus be carried out in a curve on a double-track line without tapering the route.

Expected release: April 2024

Allegra - Good Things Come in Threes

NEW Allegra ABB and Arosa – Exclusively at NOCH

Both models are exclusively produced for NOCH as a limited edition.

Since the cooperation between ABB and Stadler Rail began in 2002, Stadler Rail has ordered traction equipment from ABB for more than 1,500 regional trains and over 300 light rail vehicles. ABB Ltd (an abbreviation for Asea Brown Boveri) is a leader in energy and automation technology headquartered in Zurich. The Allegra multiple units are adorned with different prints of ABB advertising at irregular intervals.

The Allegra's railcars with fleet number 3510 show urban high-rises and the middle carriage shows the Swiss mountain landscape.

The model Allegra ABe 8/12 Arosa multiple unit is designed in the style of the 'Arosa Express' with the colours of the Chur–Arosa railway line and was specially produced for NOCH for the Chur–Arosa's 110th anniversary (1914–2024).

Allegra 'Anna von Planta'

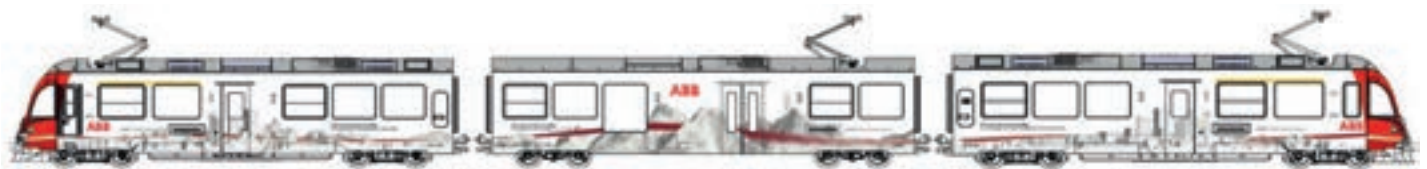

With a route network of more than 400 km in length, the Rhaetian Railway® is one of the largest private railways in Switzerland and connects world-famous tourist destinations such as St Moritz and Davos. The Allegra has two identical end wagons and a unique low-floor body structure, which enables it to be used to pull passenger trains. It can travel at speeds of 100 km/h, making it an extremely versatile high-performance train. The vehicle concept allows heavy train loads to be transported due to a high continuous output of 2.3 MW.

The new three-part 'Anna von Planta' Allegra with the fleet number 3506 comes in the usual perfect KATO quality to enrich your model railway.

Expected release: Spring 2024

Open Panorama Passenger Car – Enjoying Summer in the Fresh Air

NEW The summer breeze in your hair and a clear view are guaranteed in an open scenic carriage. In summer, the open panorama passenger cars run between Davos and Filisur, St Moritz and Tirano, on the Arosa line, and as an adventure train in the Rhine Gorge. Everyone knows and loves them: the yellow open-topped trains.

They are mainly connected to the Bernina Express, but also regular and special trains on the Bernina line and are very popular, since they can be used without additional costs or a reservation.

For a realistic excursion train, we recommend coupling several scenic carriages to the train so that as many interested passengers as possible can take part in the tourist trip.

Expected release: Spring 2024

7074072

Model Features:

- Prototype B2101 from group B2096 - B2102 from 1990
- Labeling in German and Romansh
- Minimum radius: R150
- Close coupling for Glacier Express; includes replacement Arnold coupling

Bernina Express – Discover Switzerland at a Relaxed Pace

The Bernina Express is a sightseeing train which runs on the Albula and Bernina line between Chur (Switzerland) and Tirano (Italy) and which was recognised as a UNESCO World Heritage Site in 2008.

KATO reissued these carriages after the two sets sold out within a short space of time. The Bernina Express is not just a popular passenger train in the real world; it's also an ideal train for model railways to pass through valleys and mountains. Let your favourite RhB locomotive from the current KATO range pull the carriages through your own personal landscape.

Expected release: Spring 2024

- Optional expansion possible with Function Decoder FR11
- Equipped with close couplers (including replacement Arnold couplings)

NEW **RhB Club – The Advertising Loco**

The RhB Club was a club membership for railway fans. In 2018, a Ge 4/4 II became an advertising medium for this club to attract members to its benefits. However, the number of members did not develop as the Rhaetian Railway® had hoped, and so the RhB Club closed down in 2022. This model commemorates the club. The original has already been repainted red.

Expected release: Autumn 2024

Train Travel Becomes Something to Relish Available Again: The Gourmino Restaurant Car

In 1929 and 1930, Mitropa procured three restaurant cars for the Rhaetian Railway's® luxury trains. WR 3810-3811 were designed as nostalgic restaurant cars in 1982/83 and fitted with new kitchen equipment for preparing fresh meals. Originally varnished in red, the restaurant car was renovated in 1990 and was given the elegant blue of the Alpine Classic Pullman Express (ACPE).

This restaurant car is perfect for your railway to transport passengers to another time while dining.

Expected release: Autumn 2024

NEW **Luggage and Bicycles Safely Stowed Away: The New Heating Luggage Car**

The Rhaetian Railway® uses luggage vans with a pantograph in its regional trains to provide additional electricity to the train's heating tube. With the DS4222 Luggage Car, KATO adds another interesting coach that belongs in any RhB passenger train to its range. The pantograph can be extended and retracted manually.

Expected release: Autumn 2024

7074073	5279-2	Luggage Car, no. DS4222	N

NEW **EW I Passenger Coaches**

The first standard carriages built by FFA and SIG were put into operation at the end of 1963. The stock of EW I grew continuously over a period of around ten years. The last original EW I were taken out of service at the end of 2023. KATO is producing both popular sets with some new wagon numbers for your model railway.

Expected release: Autumn 2024

- 2-part design with motor coach and trailer
- KATO bell-type armature motor for perfect speed restriction properties
- Metal pantograph
- Includes signs and stickers

NEW Rhaetian Railway® – Freight Transport Transporting Wood and Goods

Transporting freight by rail is popular in Grisons. After the first freight and container series in 2022, KATO is expanding the range with new containers, flat wagons and timber.

The Rhaetian Railway's open, four-axle flat wagons are known as all-rounders and optimal for transporting logs, containers, building materials, machines and much more.

railCare is a young business specialising in transport logistics that has been part of the Coop Group since 2010 and delivers goods from door to door in an environmentally friendly manner throughout Switzerland. With these new items and the freight products from KATO already available on the market, you'll have even greater scope for your Swiss freight transport. Your train can now be equipped with timber transport wagons and the new railCare containers.

Expected release: Autumn 2024

NOCH Ref.	KATO Ref.	Description	Gauge

NEW The Düwag Tram – My Tram Classic!

Under the label 'My Tram', Düwag trams' universal design suits any region and era. Benefit from the neutral, single-coloured paintwork of the multiple units and trailers and the simple, retro-style design. The trams can be personalised with stickers and integrated into your landscape. Thanks to its compact design, the tram can be used not only on the tram tracks, but also on UNITRACK tracks with small radii.

Expected release: March 2024

70148064	14-806-4	My Tram Classic Yellow, 2-Car Set	N

NEW EF58 Electric Locomotive

The EF58 locomotive was built in 1958 and has been used in Osaka for special trains since 1987. There, the EF58 received its brown colour, which was later painted blue in 2015. Since the colour change, the locomotive has been in Kyoto Model Railway Museum.

The model's excellent handling characteristics and realistic details such as its moveable pantographs and operating headlights are impressive! **Already available at your local dealer.**

7297977

7297978

Z Shorties – For Little Model Railways!

ROKUHAN's Z Shorties offer an ingenious opportunity to utilise the smallest spaces and make your model railway as compact as possible. The idea of the Z Shorty is to use the same chassis with or without a motor and swap the respective housing.

Select your desired housing and the corresponding Motor Chassis (NOCH ref. 7297903) or Shorty Chassis (NOCH ref. 7297905) required for operation. The Shorty Chassis serves merely as a base for the respective housing. Or create your own housing!

NEW New Housings for Your Z-Gauge Shorties

With the new Z Shorties, ROKUHAN is expanding the shorty range with another four housings.

You can get the DB Class 491 in the colours Olympic Blue und Gentian Blue. The model for the 491 series was built in 1935 as a single train for tourist trips and was intended to serve as a replacement for buses. The train was in use in the European countries of Germany, Austria, Switzerland, Italy and France.

The EMD F7 is available in attractive Rio Grande and Southern designs. It is a diesel-electric locomotive that was built and put to use in the USA. Both shorties are characterised by a minimum radius of 45 mm and are therefore able to drive along the smallest radii.

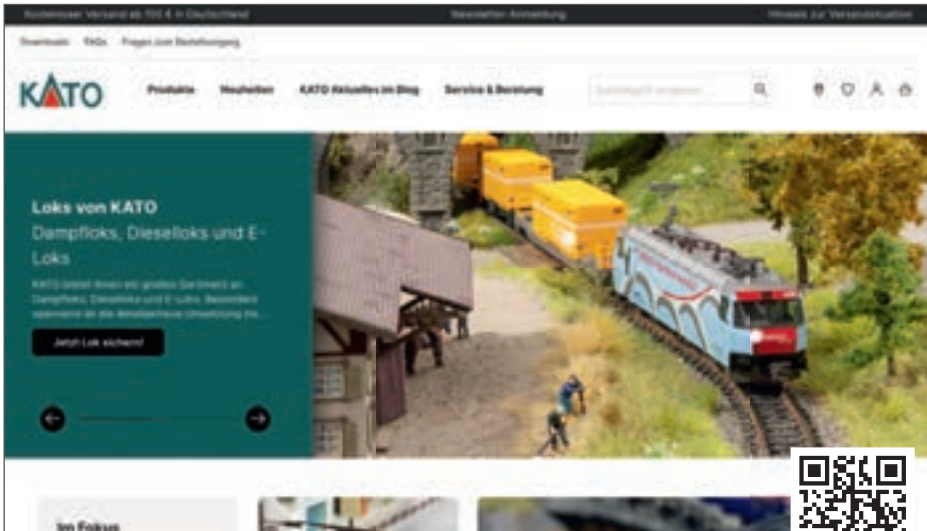

Already available at your local dealer.

Model Features:

- Minimum radius: R45 mm
- Compatible with Motor Chassis (NOCH refs. 7297903 / 7297904)
- Compatible with Chassis (NOCH refs. 7297905 / 7297906)
- Moveable pantographs (on DB Class 491)
